## I. OBJECTIVES

To gain hands-on experience in Information Technology by applying my technical skills to support system operations, enhance workflow efficiency, and contribute to secure and reliable IT solutions. I aim to assist in improving processes such as troubleshooting, software and hardware management, and data handling while supporting technology-driven decision-making. Through continuous learning, collaboration, and professional development during my training, I strive to contribute meaningfully to the organization's digital growth and long-term technological advancement.
